Address: Ilorin, Kwara, Nigeria

## SUMMARY

---

Senior Full-Stack Engineer with 4+ years of experience designing and delivering high-performance SaaS and FinTech solutions. Proven expertise in React, TypeScript, Node.js, NestJS and AWS (ECS, S3, CloudFront, Amplify). Strong background in payment orchestration, crypto-centric architectures, CI/CD pipelines, and security-first development. Demonstrated ability to lead end-to-end product delivery, improve system reliability to 99.9% uptime, and drive operational efficiency through automation and AI-enabled tools.

## WORK EXPERIENCE

---

### Fullstack Engineer

Jul 2025 - Present

*Nonceblox, Remote - UAE, Dubai*

- Designed and built Encryptus.io, a multi-currency payment engine supporting 100+ countries, achieving a 98% transaction success rate through an intelligent routing layer with failover retries and Redis caching.
- Architected a unified error-handling framework that normalizes third-party API responses, cutting issue-resolution time by 40%.
- Developed AI-driven HR and project-management tools that reduced manual administrative effort by ~80% and improved resource allocation efficiency.

### Fullstack Developer (Frontend Focused)

Dec 2023 - Jun 2025

*Manaknight Digital, Remote - Ontario, Canada*

- Led the development of Equality Records, a multi-portal SaaS platform with role-based access control (RBAC), enabling secure collaboration for over 30 enterprise teams.
- Integrated financial APIs (QuickBooks, Plaid, Stripe) into the LongTermHire product, automating reconciliation workflows and cutting manual accounting effort by ~50%.
- Optimized front-end performance across all projects, consistently achieving Lighthouse scores >99 and reducing page load times to 1.5-1.9 seconds.

### Frontend Developer

May 2023 - Feb 2024

*DERA, Remote - Lisbon, Portugal*

- Built and maintained Web3-focused front-end features for decentralized applications using React, Next.js, Web3.js, and Blockfrost.
- Accelerated product delivery timelines by ~30% through component library creation and reusable UI patterns.
- Delivered responsive, accessible interfaces aligned with the company's design system, improving user satisfaction scores.

### Freelance Software Developer

Sep 2021 - Apr 2023

*Freelancing*

- Developed multiple full-stack admin panels and SaaS platforms for international clients using Next.js, TypeScript, Node.js, Express, and PostgreSQL/MongoDB.
- Implemented authentication, RBAC, and real-time data dashboards, improving client operational visibility.
- Deployed applications on AWS Amplify, EC2, and Docker containers with CI/CD pipelines via GitHub Actions.

## EDUCATION

---

**Bachelor of Science**

*University of Ilorin*

Oct 2019 - Nov 2024

## SKILLS

---
